INTERNAL/EXTERNAL SNAP RING PLIERS (STRAIGHT/BENT)

For safety and efficient work of attaching/detaching large diameter snap ring!

It has both strong and flexible tips which you can use for the $\phi 40$ to 100mm snap ring. We have 4 selections, and you can choose them depends on your requirement.

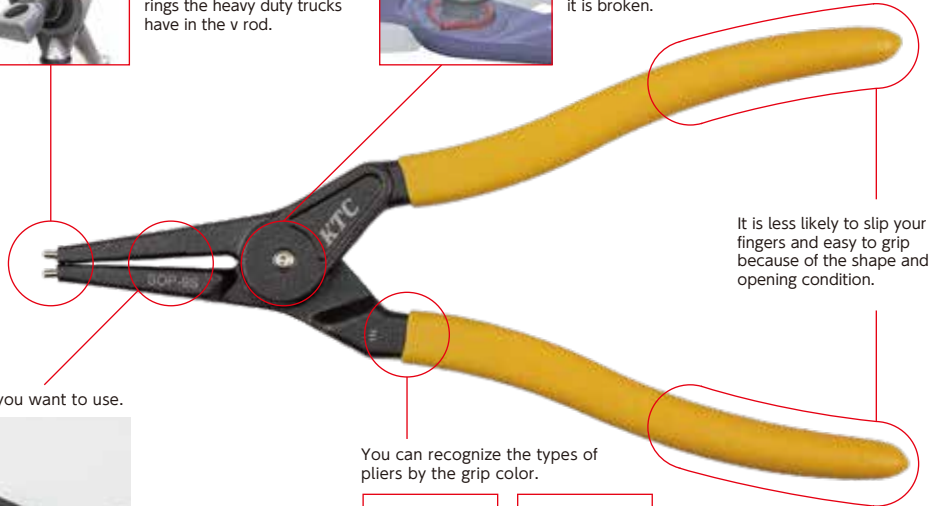

Good fit for your hands
No.SOP-9B

$\phi 2.3$ mm diameter tip is strong and specialized shape, so you can also use for snap rings the heavy duty trucks have in the v rod.

Moving part is specialized mechanism. It is inside of the joint parts, so it prevent spreading the fragment even if it is broken.

It is less likely to slip your fingers and easy to grip because of the shape and opening condition.

You can use straight or bent depending on the place you want to use.

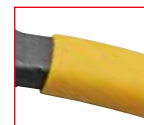

Straight

Bent

You can recognize the types of pliers by the grip color.

[Common Features]

- This is the large diameter snap ring plier. You can use it between φ40 to 100mm.
- The dimension is φ2.3mm, and you can use it for the V rod of heavy trucks.
- Your hands will fit the grip. The upper grip has a squeeze, so it is easy to adjust the opening.
- Spring is inside the body, so it does not spreading the fragment.

Types and applicable diameters of snap ring pliers

There are internal or external snap ring pliers. You use Internal snap ring pliers to insert snap ring into the groove. On the other hands, you use external snap ring pliers to put the ring by expand it. You can easily recognize internal or external snap ring pliers by grip color.

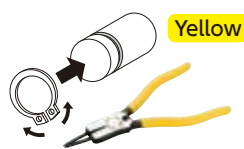

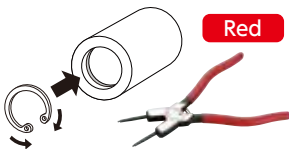

JIS(Japanese Industrial Standards) rules nominal size and the diameter of grooves snap ring has. The snap ring pliers sold by KTC fit well to C-type ring ruled in JIS.

Internal

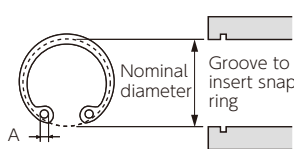

If you grip, the claw close.

External

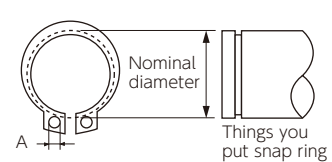

If you grip, the claw open.
