

RECHARGEABLE LED LIGHT PICKUP TOOL

<When extended>

<When retracted>

Extend, Illuminate, and Attach! Work Light with Pickup Tool

This work light features an extendable shaft and a flexible tip with a pickup tool, allowing you to illuminate work areas during vehicle inspections and maintenance while picking up small screws and parts. The bottom magnet allows you to attach it to a cabinet or wall.

No.AL817

- Brightness 100 lm
- Battery 2.0 hours
- 2 dimming levels
- USB Type-C

RECHARGEABLE LED LIGHT PICKUP TOOL

No.	Light source (lm)	Continuous use time (h)	Magnetic lifting capacity (kg)	Overall length (mm)	Weight (g)	□
AL817	100 	2.0 	Approx. 1*1 (See note)	177~505	92	1

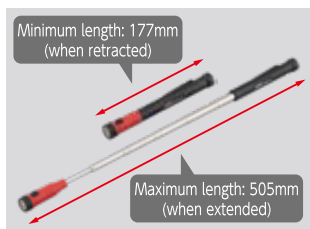

- LED light with pick-up tool that has built-in magnets at the tip and bottom.
- The length can be adjusted using the telescopic shaft, and it can be used as a penlight when stored.
- The tip uses a flexible hose, allowing the angle to be adjusted.
- Comes with a charging indicator that shows the battery status.
- Comes with a clip for easy pocket storage.
- Dimming level: 2 levels (strong and weak)
- Brightness (continuous use time): 100lm (2 hours), 30lm <weak> (6 hours)*2 (See note)
- Charging port: USB Type C, charging time is approximately 2.5 hours
- Dustproof and waterproof: IP65
- Using environment temperature: 5-35°C
- Accessories: USB charging cable (charger not included)

*1 Magnet lifting capacity is a reference value and varies depending on usage conditions.

*2 The above specifications may vary depending on the battery condition and the charging environment.

The magnet built into the tip can catch parts or screws that have fallen into narrow spaces.

The length is adjustable from 177mm to 505mm. When retracted, it can also be used as a penlight.

The flexible hose allows for free angle adjustment.

The bottom incorporates a magnet. By attaching it to metal surfaces such as cabinets or walls, it allows you to illuminate your work area and perform tasks with both hands free.

- Do not shine the LED light directly into your eyes.
- Do not use with wet hands.
- Do not use underwater or in the rain.
- Do not place near electronic devices or other items or places that are affected by magnetism.
- Cannot be charged with a quick charger. (Recommended charger conditions: 5V 1A)
- Charge using the included charging cable.
