

3/8"sq. RATCHET HANDLE

New ratchet handle, BR390, which has evolved to 90 gears in pursuit of even greater workability and operability!

The 90 drive gears, which are only available under the nepros brand, are used for the first time in the KTC brand ratchet handle. The 4° feed angle improves work efficiency, making it possible to access areas where it was previously difficult to secure the swing width.

4° feed angle for more comfortable work

Feed angle is 4° with 90 gears. As machines become smaller and the areas for maintenance become smaller, even in work environments where the conventional 36 gears would not allow the ratchet to swing, the 90 gears allows the ratchet to swing with ease and improve work efficiency.

3/8"sq. RATCHET HANDLE

No.	Feed angle	B	T	L	Weight (g)	☐
BR390	4°	33	13.7	180	275	1

- 90 gears for smooth operability and improved work efficiency.
- Feed angle of 4° enables work in narrow spaces where it is difficult to secure the swing width.
- Idling torque with lightness and certainty.
- Lever shape that transmits force and is easy to switch.
- 7-stage claw that disperses the force applied to the claw.
- Repair kit, BR390-K, available for purchase.

Be sure to operate the left and right switching levers to avoid damage or idling.

KTC's special form and function for "EASY TO USE."

It fits in your hand and is easy to use.
BR390 has evolved to 90 gears.
There is a reason for the form and function that has continued to be loved for over 20 years.

Lever that transmits force easily and is easy to switch

Changed the lever part to a mountain shape. The force from your fingertips is more easily transmitted, making it easier to switch left and right.

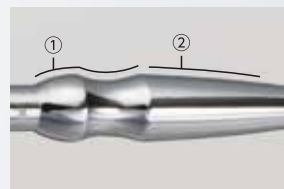

Union mechanism that securely holds the socket

Prevents the socket from accidentally coming off the ratchet, making it easy to operate even with dirty hands.

Form that is easy to grip and apply force

- ① The shape allows your index and middle fingers to hang firmly on the handle, making it easy to apply force.
- ② Easy grip with shape thinner towards the tip.

Prevents ratchet from falling out

The rounded tip of the handle prevents your fingers from getting hurt and prevents the ratchet from falling out.

90 gears change your work

The 90 drive gears achieve a feed angle of 4°, making it possible to work in places where it is difficult to secure the swing width. The precise drive mechanism combined with the 7-stage claw dramatically changes the work.

REPAIR KIT FOR 3/8"sq. RATCHET HANDLE

No.	Sq. size	Contents	Weight(g)
BR390-K	9.5sq.	Drive gear, claw, pin x 2, spring x 2, lever, lid, countersunk screw x 2	67

Application: BR390
